

UNIVERSITY OF OXFORD

Nuffield Department of Women's and  
Reproductive Health

## What causes FATIGUE?

We are looking for volunteers for a study of how bacterial imbalances in the body may affect brain rhythms, reaction time and memory tasks and blood circulation, to understand what causes fatigue.

If you are **WELL**  
or have  
**MYALGIC ENCEPHALOMYELITIS/CHRONIC FATIGUE SYNDROME (ME/CFS)**  
or  
**LONG COVID**

**and** you are aged 18-55 years old,

**and** interested in taking part in our single-visit study in one of our university sites in Headington, then we'd like to hear from you.

**Travel expenses will be reimbursed.**

For information in confidence, with no obligation to participate please contact:
