

Make a 'Together' Paper Daisy Chain!

What you'll need:

Scissors, a glue stick or sticky tape, and your printed daisy chain sheets.

Let's get started!

First, choose your favourite design. There are three to pick from or mix them all together for a colourful chain! If you've chosen the black and white version, you can colour it in any way you like. Make it bright, bold, and totally your own.

Now, print out the sheets you want to use.

Carefully cut along the dotted lines to create individual strips.

Take your first strip and bend it into a loop (with the printed side on the outside). Glue or tape the ends together to make a circle.

Next, take another strip and thread it through your first loop. Then join the ends to make a second loop linked to the first.

Keep going! Add one strip at a time, threading each new strip through the last loop before sticking it together.

When your daisy chain is long enough, hang it up as a cheerful decoration!

We'd love to see what you make so send a photo of your fabulous creation to fundraising@meassociation.org.uk so we can share it with our community and celebrate everyone's creativity.
